

Front End Developers

We have immediate openings for Front End Developers to join our team. We are a fast-paced and growing group building a platform that aggregates and reports on investment products that encompass the entire net worth of an individual or company.

The successful candidate combines a strong focus on product quality with the ability to work efficiently to deliver on schedule.

Typical daily activities include: working closely with a global team utilizing an agile development process, building responsive web applications, developing innovative UIs using cutting edge technologies, and brainstorming exciting new ideas and concepts. Also, knowledge of overall application architecture back-end components – such as application servers, database server, etc. is important. The ideal candidate will have experience with Object Oriented Javascript, React ,AngularJS, .NET Core, Web API, as well as HTML5, and CSS3. Experience or certification on AWS is preferred.

The candidate must have a demonstrated track record of developing enterprise applications with high quality. She or he must be able to work independently with a high degree of self-discipline in an Agile environment, where strong communication and collaboration skills are essential.
